PROJECTS

VeriFace — Fake Account & Media Detection System

Flutter, Django, Python, REST APIs, Machine Learning

- Developed a full-stack social media application supporting image and video posts, likes, comments, follow requests, notifications, and user search with private and public account options.
- Integrated AI-based moderation to detect deepfake media during upload, block vulgar content, and prevent toxic comments from being posted.
- Implemented additional modules including an AI chatbot for user assistance, an admin web panel for handling complaints, and a legal reporting system to manage user misconduct and enable further action.

Note Gallery — Digital Notebook for Teachers and Students

Firebase, Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite

- Developed a centralized web platform that enables teachers to upload and manage academic notes while allowing students to access learning materials anytime.
- Implemented a structured system for organizing and sharing educational resources, improving accessibility and reducing paperwork through digital record management.
